

FAN 2015: 15-17 April, Lyon (France)

International congress: fan systems, fan noise and theoretical methods and CFD.

Make sure you don't miss the chance to present your work to an international audience of experts at Fan 2015.

This three day conference will be a forum for fan and system designers, manufacturers and operators, with the aim of improving our understanding of fans and their system interaction. The conference combines the next in the series of IMechE international conferences on Fan Technology and the CETIAT / CETIM International Symposium on Fan Noise. Additionally the increasing importance of theoretical methods and computational fluid dynamics (CFD) in non-aerospace applications is recognised, with the resulting Fan 2013 international conference having three separate, but complimentary tracks:

- Industrial and commercial fan systems
- Fan noise
- Theoretical methods and Computational Fluid Dynamics (CFD).

All types of fans, such as those used in industrial process, HVAC, electronic equipment, household appliances, automotive and traction fall within the scope of the conference. Conversely, high speed fans in aeronautical propulsion applications will not be included.

Abstracts of 300 - 400 words in English need to be submitted by 8 September, via the conference website www.fan2015.org and its extranet.

We have pleasure in announcing the follow keynote speakers addressing the conference:

- **Marcos Gonzalez-Alvarez:** *Policy Officer at the energy efficiency unit of the Directorate General for Energy at the European Commission. He is in charge of several product groups, including fans (EU Regulation 327/2011).*
- **Stéphane Moreau:** *Professor at the Mechanical Engineering Faculty of Université de Sherbrooke, Canada. Well-known for many researches and publications on aeroacoustics, fan design and CFD.*
- **Alain Godichon:** *Consultant in Aerodynamics, Acoustics and Mechanical design of industrial fans and blowers, Automation of design process. His presentation will focus fan design, past, present and future.*

Sponsorship and exhibition : Your involvement with this event is an effective way to get into the minds of key decision-makers, helping you capture your chosen audience when they are in the frame of mind to do business. For information on sponsorship and exhibition please email: contact@fan2015.org

We look forward to seeing you in Lyon next year.
